Re: Freedom of Information Act Request:  
EPA-R3-2013-007361

Dear Ms. Harvey :

This is in response to your Freedom of Information Act request listed above, regarding Cecil Walker Machinery Site.

- /X/ The Office Of Hazardous Site Clean-up Division is enclosing records in response to your request..
- /X/ The Resource Conservation and Recovery Program, the Toxics Programs Branch, and the Pesticides/Asbestos Programs Branch is enclosing records in response to your request.
- / / The Air Protection Division found no records in response to your request.

PLEASE NOTE: If any Program(s) listed above has been checked, a response from that Program(s) is enclosed along with a billing invoice for the information provided if appropriate.

You may appeal this response to the National Freedom of Information Officer, U.S. EPA Records, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, NW (2822T), Washington, DC 20460, Fax: (202) 566-2147, E-mail: [hq.foia@epa.gov](mailto:hq.foia@epa.gov). Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20004. Your appeal must be made in writing and it must be submitted no later than 30 calendar days from the date of this letter. The Agency will not consider appeals received after the 30 calendar day limit. The appeal letter should include the EPA R3 number listed above. For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal."

If you have any questions, please contact me at 215-814-5553.

Sincerely,

Richard Van Holt  
Freedom of Information Officer

EPI-PA REPORT

## AUTHORIZATION

Tetra Tech, Inc. (Tt) performed this work under the United States Environmental Protection Agency (USEPA) Alternative Remedial Contracting Strategy (ARCS) Contract Number 68-W8-0092, Work Assignment Number 92-25-SJZZ.

## SCOPE OF WORK

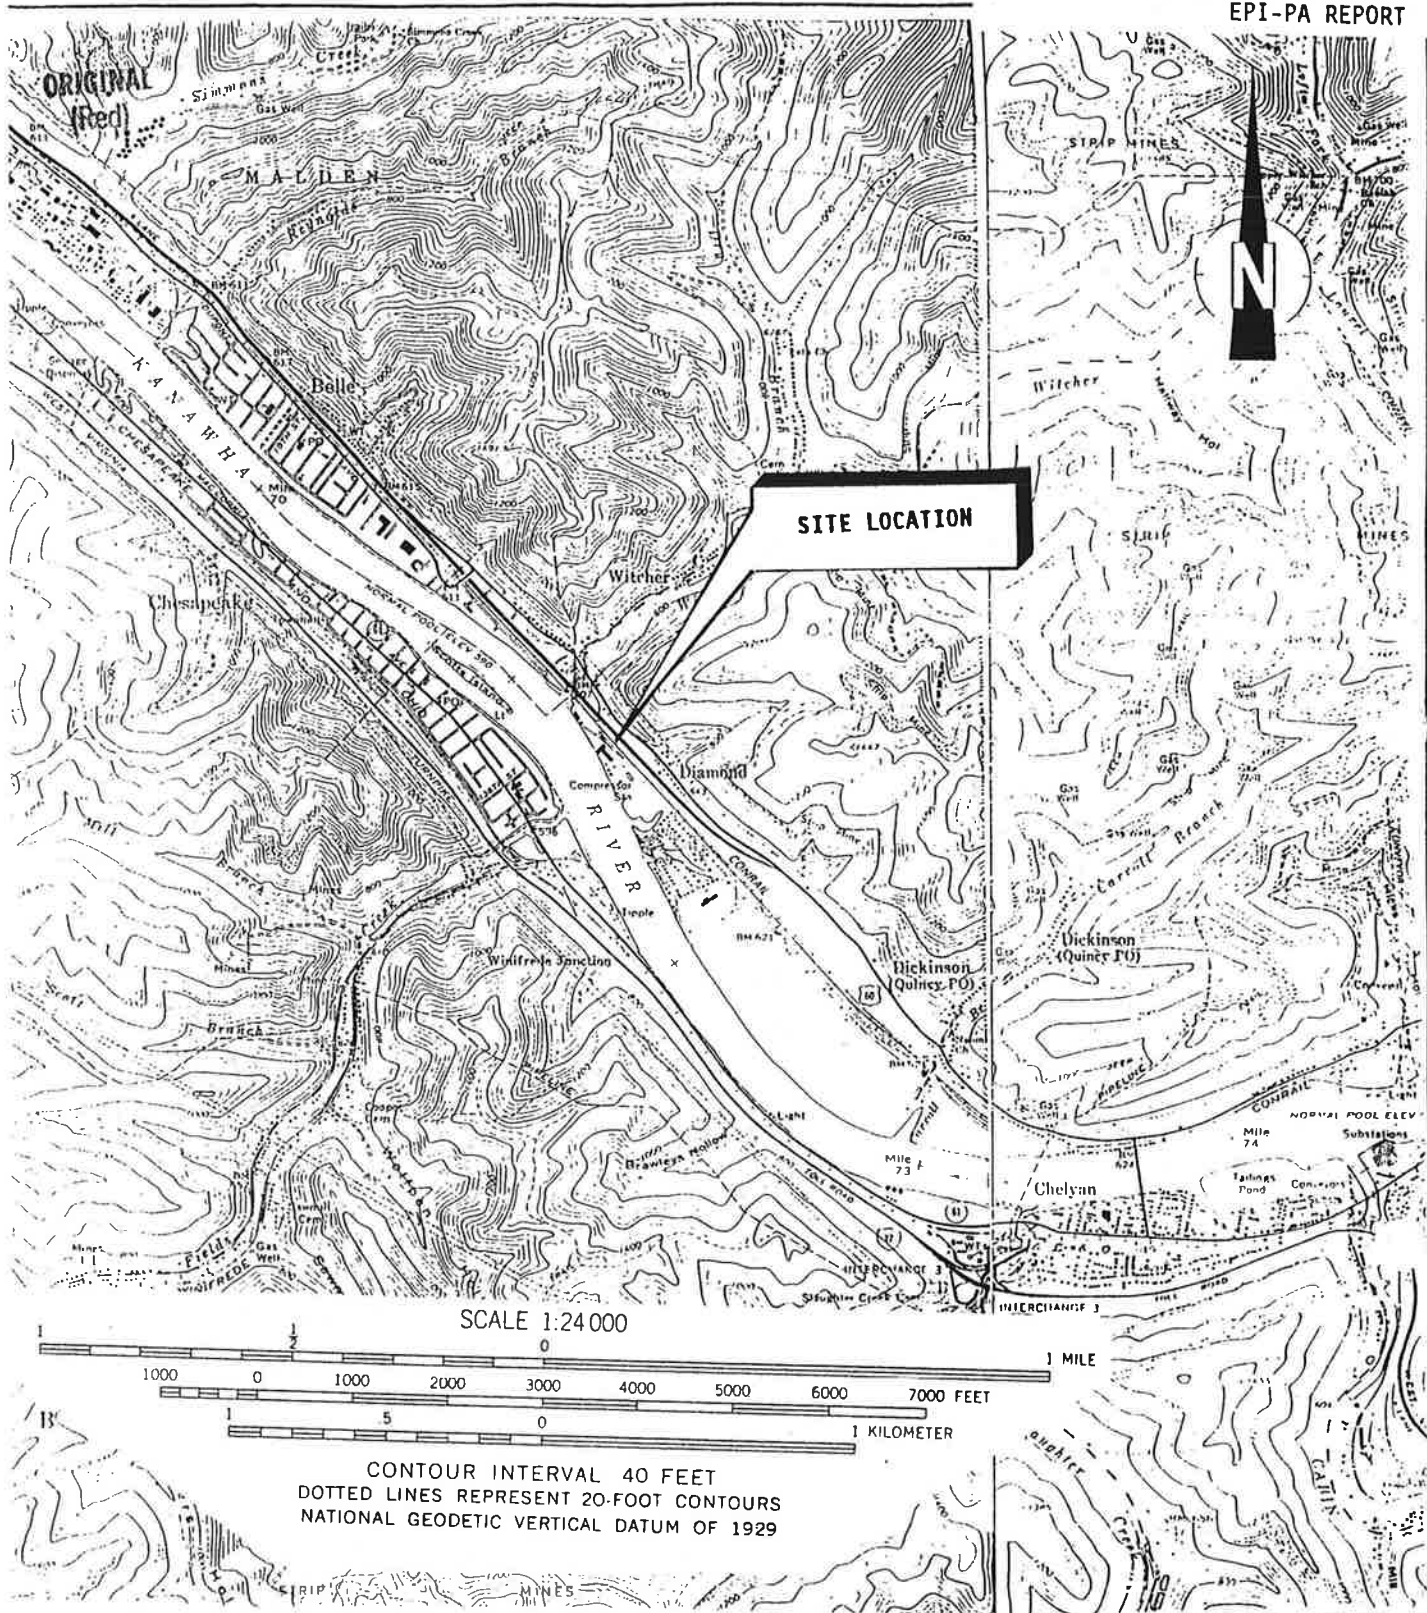

Tt was assigned to conduct an Environmental Priorities Initiative (EPI) preliminary assessment of the subject site.

## SUMMARY

The Walker Machine site is located less than 200 feet north of the Kanawha River at 114 Carbide Drive in Diamond, Kanawha County, West Virginia (Figure 1).

Walker Machine is a Caterpillar dealership with two operating offices in Kanawha County. The subject site (USEPA Resource Conservation and Recovery Act ID Number WVD988775326) is used for sales and storage of heavy equipment, used parts, cars and machinery. The site is situated on a 5.128-acre parcel of land and is surrounded by a barbed wire fence (Figure 2). The main building consists of a 1200-square foot office and a 5400-square foot warehouse. A storage shed is located east of the main building and a storage trailer is located southwest of the main building; both are used for general storage.

Drainage from the site enters storm drains on site and is discharged directly into the Kanawha River. The Kanawha River flows west from the site and is protected for category A (public water supply) and category C (water contact recreation) uses by West Virginia Division of Natural Resources. No significant wetlands exist in the study area.

WALKER MACHINE SITE  
CERCLIS NO. WVD988775326  
EPI-PA REPORT

According to Mr. George Moore, Administrative Service Manager for Walker Machine, one Safety Kleen parts washer unit was leased for this site (Diamond, Kanawha County) in October 1990. In November 1990, Walker Machine submitted a Notification of Hazardous Waste Activity as a small quantity generator for the following USEPA RCRA hazardous waste codes: D001 (ignitable) and D039 (tetrachloroethylene). Prior to receiving USEPA RCRA ID No. WVD988775326, Walker Machine relocated the Safety Kleen parts cleaner to their main shop facility in Belle, Kanawha County, West Virginia, approximately 1.5 miles west of the subject site (USEPA RCRA ID No. WVD981113327). The Safety Kleen unit was never operated at the subject site (Diamond facility). Walker Machine maintains USEPA RCRA ID No. WVD988775326 as a protective filer although no hazardous waste is generated at this site.

Residents within a four-mile radius of the site obtain their potable water from either the West Virginia American Water Company (WVAWC) or from home wells. WVAWC serves approximately 144,000 people, approximately 8,250 of whom live within four miles of the site. WVAWC obtains water from one surface water intake on the Elk River located outside the study area. Approximately 1,450 people in the study area use home wells for their potable water source. The nearest home well is approximately 0.5 miles northeast of the site.

Approximately 9,702 people reside within four miles of the site.

The Walker Machine site is located within the Appalachian Plateaus Physiographic Province, which is underlain by essentially flat-lying sedimentary rocks of Paleozoic age. Bedrock in the site vicinity consists of rocks of the Kanawha Formation, which is made up of approximately half sandstone, and smaller amounts of siltstone, shale and coal. In the Kanawha River valley, the Kanawha Formation is unconformably overlain by Quaternary-age alluvium consisting of clay, silt,

sand, and gravel. The alluvium is poorly sorted, although there is a general decrease in grain-size upward.

Soil at the Walker Machine site has been mapped as Urban Land, which has most of its surface covered by impervious material. Included in this map unit are areas which have been filled with fly ash or a mixture of soil and building materials.

Ground water occurs under artesian pressure in joints, bedding planes, and in any available intergranular pore spaces in rocks of the Kanawha Formation underlying the site. Wells tapping the Kanawha Formation are generally capable of yielding water supplies which are adequate for domestic use, and local wells are capable of yielding industrial or public water supplies.

Ground water in the alluvium of the Kanawha River valley occurs in, and moves through, intergranular pore spaces and is under water table conditions. Although the alluvium is quite permeable, it is too thin and geographically restricted to be an important aquifer.

Based on topography near the site, shallow ground water is expected to flow west-southwest and discharge into the Kanawha River.

Land use in the area is primarily industrial and residential. Chemical plants operated by DuPont and Occidental are located within a four-mile radius of the Walker Machine site. The unincorporated town of Diamond is located approximately 1100 feet east of the site.

Tetra Tech personnel Stacey Ainbinder and Philip Younis conducted an Environmental Priorities Initiative (EPI) preliminary assessment of the site on June 24, 1992. The field team was met by George Moore and Frank Green of Walker Machine, and Penny Brown of West Virginia Division of Natural Resources. Photos were

**NOTICE OF VIOLATION**

DATE: January 30, 1998

TIME: 1600 HRS

ISSUED TO: Cecil I. Walker Machinery Co.

EPA I.D.#: WVD016127516

FACILITY MAILING ADDRESS: 4010 Emerson Av.

Parkersburg, WV 26101

FACILITY REPRESENTATIVE: Ken Cunningham

On the date and time specified, an authorized agent of the Chief of the Office of Waste Management conducted an inspection of the facility described above in accordance with West Virginia Code, Chapter 22, Section 18 and/or an Order or Permit issued pursuant to §22-18. During that inspection, the following violation(s) were noted:

1. A. (Regulation) 40 CFR §262.11 as referenced by 33CSR20 Section 5.1 of the West Virginia Hazardous Waste Management Rule (hereinafter the Rule).  
B. (Facts) Cecil I. Walker Machinery Co., Parkersburg, WV has failed to fully characterize all of their waste streams (parts cleaning solvents).
2. A. 40 CFR §279.22(c) as referenced by 33CSR20 Section 14.1 of the Rule.  
B. The Facility has stored used oil in containers and one tank which were not labeled "Used Oil".
3. A. 40 CFR § 279.22(d), as referenced by Section 14.1 of the Rule.  
B. Numerous areas of used oil spillage were present at the facility. The facility has failed to immediately contain and clean up the used oil and used oil contaminated soils.

**In order to attain compliance with the cited Code and/or Regulations, you must perform the following remedial actions:**

1. Upon receipt of this Notice, Immediately begin clean up of the spilled used oil and label the used oil tank and containers with the words "Used Oil".
2. Within 30 days of this Notice or within 30 days of the next routine parts cleaner servicing perform a hazardous waste determination (TCLP heavy metals and volatile organics) on the solvent from the four parts cleaning basins currently managed as non-hazardous waste.
3. Within 5 days of the completion of the hazardous waste determinations respond to this inspector in writing your attempts to comply with the requirements listed above.

A copy of this Notice of Violation will be forwarded to the Enforcement Unit of the Office of Waste Management. The issuance of the Notice may result in an administrative civil penalty being levied in accordance with West Virginia Code § 22-18-17.

Dear Mr. Peters:

Your response to our February 14, 1989 Notice of Non-Compliance satisfies the items of the Notice except Item 1(a) "appoint an employee to be an emergency coordinator . . . duties". *Violation #1*

Section 10.1.3.d.1 of the West Virginia Hazardous Waste Management Regulations states that "at all times there must be at least one employee either on the premises or on call . . .". While Mr. Moore would be on call, he is an employee and emergency coordinator at the Belle facility, which is a separate facility. In order to be in compliance, an emergency coordinator should be an employee at that facility.

If there are any questions concerning this matter, please feel free to contact me at 348-2745.
